

LAGO LOW TABLE

Valencia

Lago is a basic object conceived as a free unattainable gesture contained in the stone. A piece of great geometric complexity which formal restraint is, however, at its design basis. Its curves put a stop to a material that otherwise would extend further out of the limits, thus creating the impression of stillness. Natural stones and stainless steel are the only elements of a piece that tackles the, at first glance, conflict between the essential and its formal complexity.
